Additional Questions

What do you know about Microsoft Azure and AWS? Have you ever worked with cloud technologies? If so please describe.

I know what Microsoft Azure and AWS are two of the leading cloud service providers, offering a wide range of services for computing, storage, databases and deployment.
Azure is of Microsoft and AWS is of Amazon.
i only have theoratical knowledge about it mostly , but for one of my project have worked on AWs and used services like s3 , Glue and QuickSite , Other than that Deployed a site on AWS using EC2 instance , dont have practical experience with Azure.

What is FIFO in aws queue? What is the purpose of Queue?

I dont have particular understanding of FIFO in AWS , but i know the Function and Purpose of Queue and FIFO , which is first in first out and indicstes that the tasks or the things to be executed in the sequence , like the the first thing will be done first and so on and so forth.

Have you ever setup the CI/CD pipeline? Do you know how to deploy the Lambda functions/Create them?

Yes, I have set up CI/CD pipelines using tools like GitHub Actions, Jenkins. These pipelines automate the process of code integration, testing, and deployment, ensuring that new code changes are consistently and reliably delivered to production. This reduces manual intervention, speeds up the development cycle, and improves code quality.

Deploying AWS Lambda Functions
I dont have experience with lambda functions.
